Custer County Public Health recognizes that based on scientific evidence it is critical to slow the transmission of COVID-19 as much as possible to protect the most vulnerable, and to prevent the health care system from being overwhelmed. One proven way to slow the transmission of COVID-19 is to limit interactions among people to the greatest extent practicable, and to increase the distance between individuals in the work environment. This Public Health Order (PHO) helps to preserve the welfare of our residents by reducing the chance of spread in our community, our workplaces, while preserving critical emergency and healthcare capacity in Custer County.
